Agenda

- NPS Use Case
- Working on 2D Array → Matrices
  - Transpose ✓
  - Indexing, Slicing
  - Masking, Aggregation
- FitBit data analysis ✓

NPS → Net Promoter Score

- Working as DA at Airbnb
- Your task is to get NPS Score

  - NPS ?? ✓
  - Data ?? ✓

0 1 2 3 4 5 6 7 8 9 10

Not at all good

Extremely good / Satisfied

3 / 3

NPS score → vary from company to company

0	1	2	3	4	5	6	7	8	9	10

Detractors

against recommendation

100 → 150 → 500

Neutral/Passive

Promoters??

↳ Highly likely to recommend our product

TTT

4 / 4

$$\boxed{\text{NPS Score} = \%\ \text{promoters} - \%\ \text{detractors}}$$

Hotel service

40 → P

30 → N

30 → D

NPS Score = %P − %D

= 40 − 30 = 10
